PROFESSIONAL SUMMARY

Motivated Cyber Security undergraduate at Amrita Vishwa Vidyapeetham with strong foundations in C++, Python, Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, and Computer Networks. Passionate about software development, problem-solving, and building scalable applications through hands-on projects, hackathons, and technical initiatives.

EDUCATION

Amrita Vishwa Vidyapeetham

B.Tech in Cyber Security — CGPA: 7.89/10.0

Sri Chaitanya Junior College

Intermediate (MPC) — 94%

Chennai, Tamil Nadu

Expected Graduation: 2027

TECHNICAL SKILLS

Programming Languages: C++, Python, C

Core Subjects: Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

Web Technologies: HTML, CSS, JavaScript, Flask

Databases: MySQL, SQLite, SQL

Tools: Git, GitHub, Linux, VS Code

Cybersecurity: Network Security, Vulnerability Assessment, Security Fundamentals

PROJECTS

Smart Hospital Management System | *Python, Flask, SQLite*

- Developed a hospital management system to manage patient records, doctor information, and appointment scheduling.
- Implemented authentication, appointment booking, and patient management functionalities.
- Designed a structured database system for efficient storage and retrieval of healthcare records.

Password Security Analyzer and Hash Evaluation System | *Python, Flask*

- Developed a password analysis tool to evaluate password strength and security.
- Implemented hashing algorithms, entropy calculations, and password validation mechanisms.
- Generated security recommendations to improve password resilience against common attacks.

Smart Emergency Response and Incident Tracking System | *C++, SQL, OOP*

- Developed an incident management system to streamline reporting and tracking of emergencies, accidents, and safety-related events.
- Implemented case prioritization, status tracking, incident categorization, and database-driven record management using object-oriented programming concepts.
- Designed an administrative dashboard displaying incident trends, response times, resolution statistics, and priority-wise analytics.
- Enhanced operational visibility through centralized monitoring, reporting, and real-time incident management workflows.

Network Port Scanner and Vulnerability Reporting Tool | *Python, Socket Programming*

- Developed a network scanning application for identifying open ports and active services.
- Implemented automated service detection and vulnerability reporting features.
- Generated structured scan reports to assist in network security assessment and analysis.

LEADERSHIP & ACTIVITIES

- Core Member of FACT (Forensic Analysis Club and Triage), Amrita Vishwa Vidyapeetham.
- Volunteered for KyberAstra Hackathon, supporting event coordination and technical activities.
- Participated in Smart India Hackathon (SIH) 2024 and multiple university-level hackathons focused on software development and innovation.

CERTIFICATIONS

- Google Cybersecurity Professional Certificate.
- Oracle OCI AI Foundations Associate.
